Education

Web Development Certificate — Humber College, Toronto

2024 - May 2025

- A Dean's list student focusing on best practices and modern tools for Front End, Back End, and Full Stack frameworks.
- Learned to code while also incorporating principles found in UX/UI Design, Accessibility standards, and Web Security concerns.
- Used tools such as Visual Studio Code, Visual Studio 2022, Figma, MySQL, MAMP, MongoDB, and others while doing coding projects.

Bachelor's Degree — McMaster University, Hamilton

2014 - 2019

Experience - Academic Projects

Shoe Store - E-Commerce Website — MERN

Full Stack Developer, UX/UI Designer, DB Designer

- Achieved CRUD functionality for the administrator to create, read, update, and delete products and published a client facing ecommerce website for users to add items to cart and checkout within a 6 week capstone timeline; then deployed on Vercel.
- Housed the data on MongoDB, used Express and Node.js as the backend server, and React with Vite for the client side user component rendering.
- Was a study on the inner workings of modern E-commerce applications and their stack requirements; including localHost storage, image rendering and storage, as well as data retrieval and uploading.

Water Bottle Storefront - E-Commerce Website — Next.js

Full Stack Developer, UX/UI Designer

- Final project for a Full Stack Development course. Achieved goal to connect a front end user framework with a backend server with multiple api endpoints
- Next.js was used with Express, Node.js and mongodb for a database.

.NET Group Project - Card Collection + Music Album Website — C# and ASP.NET Core

Back End Developer, UX/UI Designer

- A cumulative .Net group project for a Back End development course that spanned a semester.
- Involved designing and creating a SQL database and connecting it to a .net framework through Models, then creating Controllers and Views in accordance with the MVC framework.
- After creating a functioning webpage, the project was paired with another student's project to create a joint project with one-to-many, many-to-many, and one-to-one relationships.

Proficiencies

MERN

React

Redux

NextJs

ASP.Net

PHP

Laravel

MySQL

UX/UI Design

Bootstrap

Figma

Node.js

C#
